## DEVELOPING ECOSYSTEMS FOR THE FUTURE

Natural products are taking off and embarking on a new era. It is no longer enough to offer quality plant extracts; now people demand a connection to their geographic origin and a trusting relationship with the men and women who grow the plants.

**Herbarom** was created precisely from this desire: offering plant materials that encourage us to re-establish ourselves in this world, to reconnect to land loaded with history, to build new relationships with the people who cultivate the soil and know how to get the very best out of the plants themselves.

## ABOUT US

Founded in Drôme, a land of tradition and the birthplace of organic farming, Herbarom specialises in plant extraction and distillation.

A real pioneer, Herbarom has been developing its expertise for 25 years alongside its human project to meet new expectations in cosmetics, aromatherapy and perfumery.

## SPECIALIST IN EXTRACTION & DISTILLATION

Herbarom's core business, the distillation of **essential oils**, is based on three key points:

- Development of **100% pure and natural products**;
- Direct supervision from the very source, thanks to the close relationship with farmers;
- Over 25 years in the art of distillation.

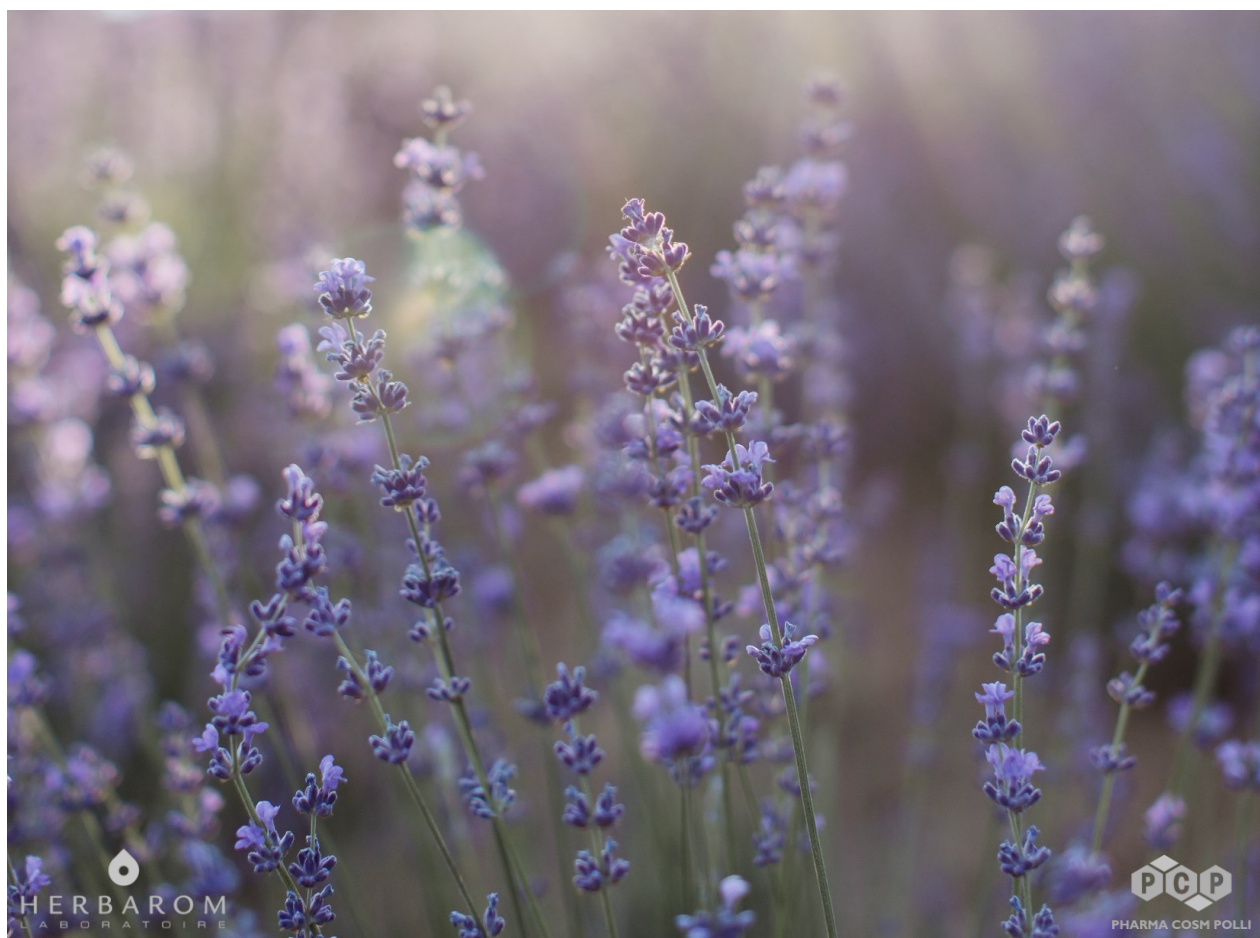

---

## GIVING SUBSTANCE TO PLANT PRODUCTS

Herbarom believes that every extract is the fruit of virtuous ecosystems involving plant farming, processing, formulation and use by consumers. It wants to establish this relationship with the natural world in time and space, lastingly, through a real passion for goodness and wellness..

Herbarom prefers plants grown organically. Our gentle extraction techniques (enfleurage, static maceration, thin layer extraction, green extraction) allow us to offer a wide range of hydrophilic extracts or lipophilic extracts.

## CHOOSING ORGANIC

---

## ECO – DESIGN

Ensure ingredients regenerate by natural ecosystem processes at a higher rate than the rate at which they are harvested, without permanently exhausting resources.

HERBAROM prefers the use of raw materials grown near production sites to minimize carbon footprint.

HERBAROM promotes organic farming.

HERBAROM masters distillation processes by steaming, leaching, concentration and maceration. The traditional technique of heating over an open flame guarantees a slow and respectful distillation of the plants. Use of additive-free water allows distillation by untreated steam drive.

HERBAROM is a source of advice on the choice of ingredients composing formulas while favouring multifunctionals.

HERBAROM enriches formulas from reputed plant properties, from ingredients certified by COSMOS standards.

# NATURAL EXCELLENCE

---

Specialists in the distillation and extraction of vegetable matrices, Herbarom enriches its line with a wide range of references in the traditional and organic version.

essential oils

distilled waters

floral waters

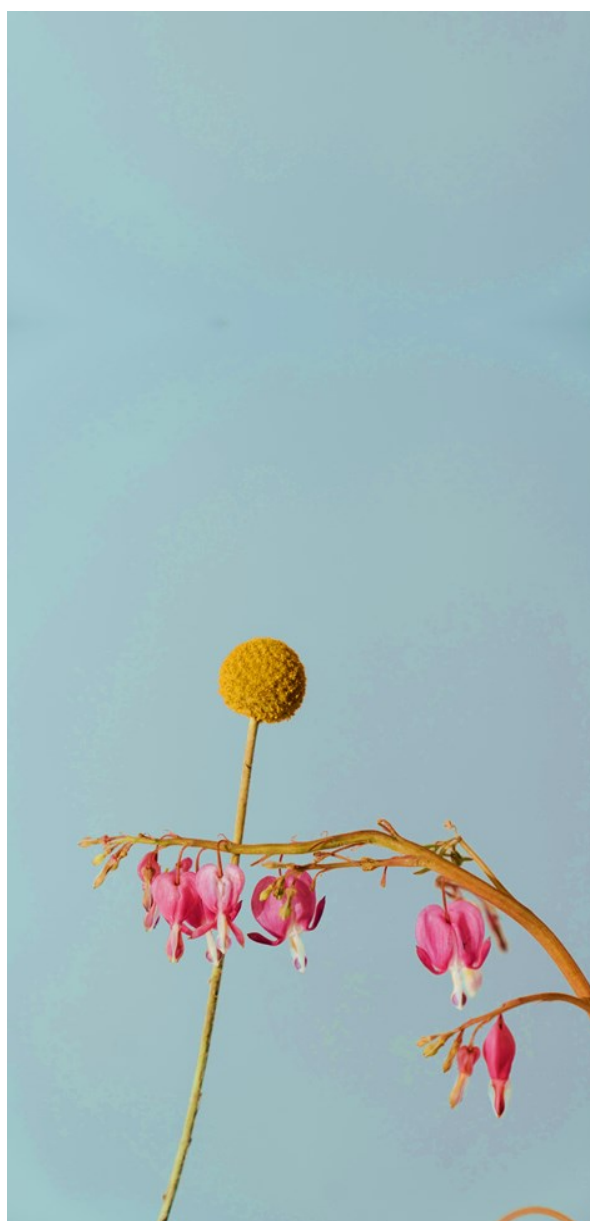

aquacell

hydrolates

macerated oils

hydroglycerin extracts

aloe vera

# ESSENTIAL OILS

---

- ANISE
- ATLAS CEDAR WOOD
- BASIL
- BERGAMOT
- BITTER ORANGE
- CAMPHOR
- CARROT
- CHAMOMILLE
- CINNAMON
- CLOVE BUD
- CYPRESS
- ESTRAGON
- EUCALYPTUS
- FENNEL
- GERANIUM
- GINGER ROOTS
- GRAPEFRUIT
- HELICHRYSUM
- HYSSOP
- INCENSE
- JUNIPER
- LAVANDER
- LAVANDIN
- LEMON
- LEMON BALM
- LEMON VERBENA
- LEMONGRASS
- LITSEA CUBEBA
- LOVAGE
- MANDARIN
- MARITIME PINE
- MYRTLE
- NIAOULI (MELALEUCA QUINQUENERVIA)
- OREGANO
- PALMAROSA
- PATCHOULI
- PEPPERMINT
- RAVENSARA
- ROSE
- ROSEMARY
