

TSUNO

FROM JAPAN, THE BEST OF RICE

PHARMA COSM POLLI

FROM JAPAN, THE BEST OF RICE

The Japanese company **Tsuno Rice Fine Chemicals Co., Ltd** was founded in 1972 as a spin-off of the food industries Masaji Tsuno to optimize the use of rice bran that had been already a waste product of the core business.

Forerunner of scientific research about rice, nowadays Tsuno uses this important natural resource to develop various products based on the concept of **Rice Therapy**.

The functional principles are mainly obtained from the husk, bran, and pulp of white rice grain (*Oryza sativa*). That consents to offer products with antioxidant, moisturizing, emollient, and lightening proprieties that can be incorporated in skin-care, sun-care, and hair-care formulations.
