Inspiring natural ingredients to grow your projects

SPECIALIST IN NATURAL INGREDIENTS & CREATION OF PLANT EXTRACTS FOR OVER 30 YEARS

HERBAROM LABORATOIRE has become a key French player in the following markets :

COSMETIC

FLAVOR & FOOD

NUTRITION & HUMAN HEALTH

ANIMAL NUTRITION

HERBAROM LABORATOIRE was born from our **passion for nature and plants**, as well as our belief in their **benefits** for human, animal and plant health. Plants are the heart of our DNA.

Whether for its rarity, its history, the tradition linked to it, its properties, its origin, its extraction process or its effectiveness, **each plant raw material is precious.**

OUR MISSION

IS TO HELP YOU CHOOSE THE ONE THAT MAKES
« SENSE » FOR YOU AND YOUR PROJECT, WHILE
ENSURING RESPECT FOR PLANT MATERIAL AND
ITS NATURAL BENEFITS.

PLANT WATERS

Hydrolats and distilled waters, true treasures of nature, are obtained through **steam distillation** of plants. This delicate process captures the **volatile compounds** of plants and leads them to a condenser, where the magic works: when the plant contains essential oils, these, light and precious, float on the surface, while a soft and subtly aromatic water forms below.

The difference lies in the raw material used: when the distillation concerns **fresh plants**, we obtain hydrolates, rich in benefits and marked by the vitality of the plant. On the other hand, **dry plants** produce distilled water. These offer an alternative to ensure constant availability throughout the year.

Recommended incorporation percentage - between 1 and 100 %

TECHNICAL EXTRACTS

• HYDROGLYCERINED EXTRACTS

Hydroglycerin extracts are obtained by extracting different parts of the plant in water. These extracts are then filtered to remove impurities. Then we add glycerin: if the percentage of glycerin is 80%, it is not necessary to add preservatives, but if the percentage of glycerin is lower, it is necessary to add a system of preservatives.

Recommended incorporation percentage - between 1 and 10 %

• OILY MACERATES

Oily macerates are macerations at room temperature of plants in vegetable oil (generally sunflower, olive, macadamia, etc.). These extracts may contain natural antioxidants to slow down the oxidation of its oily macerates, but they may also not contain any. The oily macerates are filtered and packaged under nitrogen to allow optimal conservation.

Recommended incorporation percentage - between 2 and 100 %

Uses

Skincare

- Serums
- Creams - emulsions
- Eyes contours
